Education

University of Central Florida — Orlando, FL
Bachelor of Science in Computer Science, Minor in Math — *Expected Dec. 2027*
Relevant Coursework: Data Structures & Algorithms I & II, Web/Mobile Development, Operating Systems

Experience

Software Engineer Intern — Jun. 2026 – Sep. 2026
F5 — *Seattle, WA*
- Developed a **Python** & **TypeScript** agent that analyzes multiple QKViews in parallel, reducing troubleshooting workflows.
- Designed MCP transport with 8 tools, cutting multi QKView analysis from **3m 47s** to **45.3s** leading to an overall **80%** increase.
- Implemented a three-layer detection model, spanning 8 module types that extracts targeted signals from **100,000+** line QKViews.
- Built a brace-depth-aware config parser that accurately counts object declarations across **20+** traffic types without false positives.

Software Engineer Intern — Jan. 2026 – Jun. 2026
The Walt Disney Company — *Lake Buena Vista, FL*
- Reduced false-positive alerts by **82%** through **C#** REST APIs, improving signal accuracy for real-time ride system monitoring.
- Migrated **40GB+ MSSQL** database to **PostgreSQL**, preserving **1200+** trigger configurations and maintaining zero data loss.
- Containerized microservices with **Docker** x **Kubernetes**, cutting deployment time by **40%** and enabling zero-downtime releases.
- Built a **Figma** UI modernization by migrating **30+** legacy **Blazor** & **Telerik** components to a responsive **Bootstrap** framework.

Software Engineer Intern — May 2025 – Dec. 2025
Florida Blue — *Jacksonville, FL*
- Built **20%** of BDD functional test cases for the Sales website using Playwright and **Cucumber** accelerating release cycles.
- Automated **60%** of smoke test cases for the P360 website using **Playwright**, cutting manual testing time for **14+** million users.
- Implemented core QueryGPT features with **Python, LangChain,** and **SQL** to improve LLM Q&A accuracy and speed by **23%**.
- Tested LLM Q&A endpoints with **Bruno** to identify and resolve query-handling errors, improving response reliability.

Projects

Glint | *Python, HTML, CSS, JavaScript, ElevenLabs, Ollama, Arduino, NVIDIA Jetson Orin Nano, Rasberry Pi*
- **1st Place Winner** out of **212** projects for the **Best Embedded Award** at Knight Hacks 2026 Hackathon.
- Developed an AI reply engine for an eye-movement communication device, utilizing EOG sensors, glasses, and **Qwen3** responses.
- Cut on-device LLM load on an **NVIDIA Jetson Orin Nano** by replacing one reply list with parallel one-reply **Ollama** requests.

CareerWise | *Python, Supabase, PostgreSQL, FastAPI, PostHog, React, TypeScript, Next.js, Mapbox, Recharts*
- **1st Place Winner** out of **8** projects for CareerRise's Challenge at JPMorganChase Code for Good 2025 Hackathon.
- Developed a full-stack economic mobility dashboard analyzing **77+** metrics across **7** indicator categories for **11** counties with a team.
- Built an automated ETL pipeline processing **40,000+** quarterly employment records from the Bureau of Labor Statistics API.

Formify | *Python, OpenCV, MediaPipe, Flask, HTML, CSS, JavaScript, C++, Arduino*
- **1st Place Winner** out of **93** projects for the **Best Overall Award** at Knight Hacks 2024 Hackathon.
- Engineered a **Flask** backend processing **54** pose/hand landmarks per frame at 28 FPS to detect real-time movement deviations.
- Collaborated on integrating an **ESP32-powered glove** with 2 WiFi-triggered vibration motors responding to motion feedback.

Leadership & Professional Development

President — Aug. 2026 - Present
ColorStack UCF Chapter — *Orlando, FL*
- Founder and leader of the ColorStack UCF Chapter, focused on increasing the number of black and latinx students in tech.
- Leading chapter development by establishing the executive board, structure, and plans for workshops, development, and networking.

Workshop Director — Aug. 2024 – Jan. 2026
Knight Hacks — *Orlando, FL*
- Managed a team of **13** to teach **600+** students, professional, software development, and hackathon skills in workshops.
- Organized **40+** workshops with sponsor companies and clubs to create internship & networking opportunities for students.
- Introduced new workshop formats that increased participant engagement and retention by **30%** compared to previous semesters.
- Collaborated in organizing Knight Hacks 2025 Hackathon for over **1500+** registrants, **1000+** hackers and **15+** sponsors.

Technical Skills

Languages: Python, Java, C, C++, C#, HTML, CSS, JavaScript, TypeScript, SQL
Frameworks/Libraries: React, Tailwind CSS, Blazor, Node.js, Next.js, Flask, FastAPI
Platforms/Tech: Windows, Linux, GitLab, Docker, Kubernetes, PostgreSQL, MSSQL, Supabase, Postman, Bruno, Swagger, Unity
Tools: Git, Visual Studio, VS Code, GitKraken, DBeaver, Figma, Blender, Canva, Android Studio, Claude Code, Codex, Copilot
